

The Signs of the Last Day:

By R'Ben-Hayil and Dr. R' Hadassah Yellen

The foretelling of “The Sun rising in the West” as a sign of the END:

The hysteria of planet X entering into the solar system and flipping the earth’s North and South poles into a temporary shift of electromagnetic does make the compass temporarily reading that the formerly Eastern sun is at that time, coming up in the West.ⁱ The temporary matters of an electromagnetic change within the earth’s poles creating an illusion that the West is now the East still has reasons for concern. Is this temporary change what the prophets meant? According to the ancient Hebrew prophetic expression, “The Sun rising from the west” meant symbolically to represent the heathen worship systems of the Sun resurrecting from the Roman West. This ancient expression identified geographically where the sun-worship religious system of Rome resides. Historically the Sunday keeping Roman emperor legislation’s rhythm armed with civil legislation enforcing the canon letters of Sunday worship was not an illusion then nor should it be now. The war declared by the prophet Moses to Edom (Rome) was that the idolatrous image of Rome SUN worship must be eradicated. Yet, the papal powers remain absolute with their agenda of Sun worship within their enforced Sunday laws. Within the late pope John Paul II’s Apostolic letter *Dies Domini* “The Day of the LORD” issued on May 31, 1998, the letter called not only for more faithful Sunday observance, but also applauded the Roman emperor Constantine for his “Legislation of the rhythm of the week.”ⁱⁱ Elsewhere in this apostolic letter, the late pope John Paul II called for “the state to enforce Sunday-keeping by law.”ⁱⁱⁱ Does it make any difference of when one rests and acknowledges in worship the Creator? According to the prophet Moses, the Sabbath day is the day of which we remember and acknowledge the Creator.^{iv} The *Sabbath rhythm* is where nature confirms that every seven seconds, every seven minutes, every seven hours, every seven days, every seven weeks, every seven months and every seven years is a nature-rest-cycle. By observing the Creator’s rest cycle, the health status of the human body is enhanced and strengthened. Disrupting this cycle to acknowledge the Roman cycle of the first of the week does indeed pad the pocket of the largest pharmaceutical and medical systems. Would there be a financial policy biased to rob people of their rights to be healthy and well through the original intent of the Creator’s simplicity of the Sabbath worship? Indeed this matter is the legislation of the *dis*-rhythm of the week making the SUN worship day enforced worldwide, thus making the warnings of the Western SUN rising a sinister reality of rebellion against the Creator of the Universe.
